To

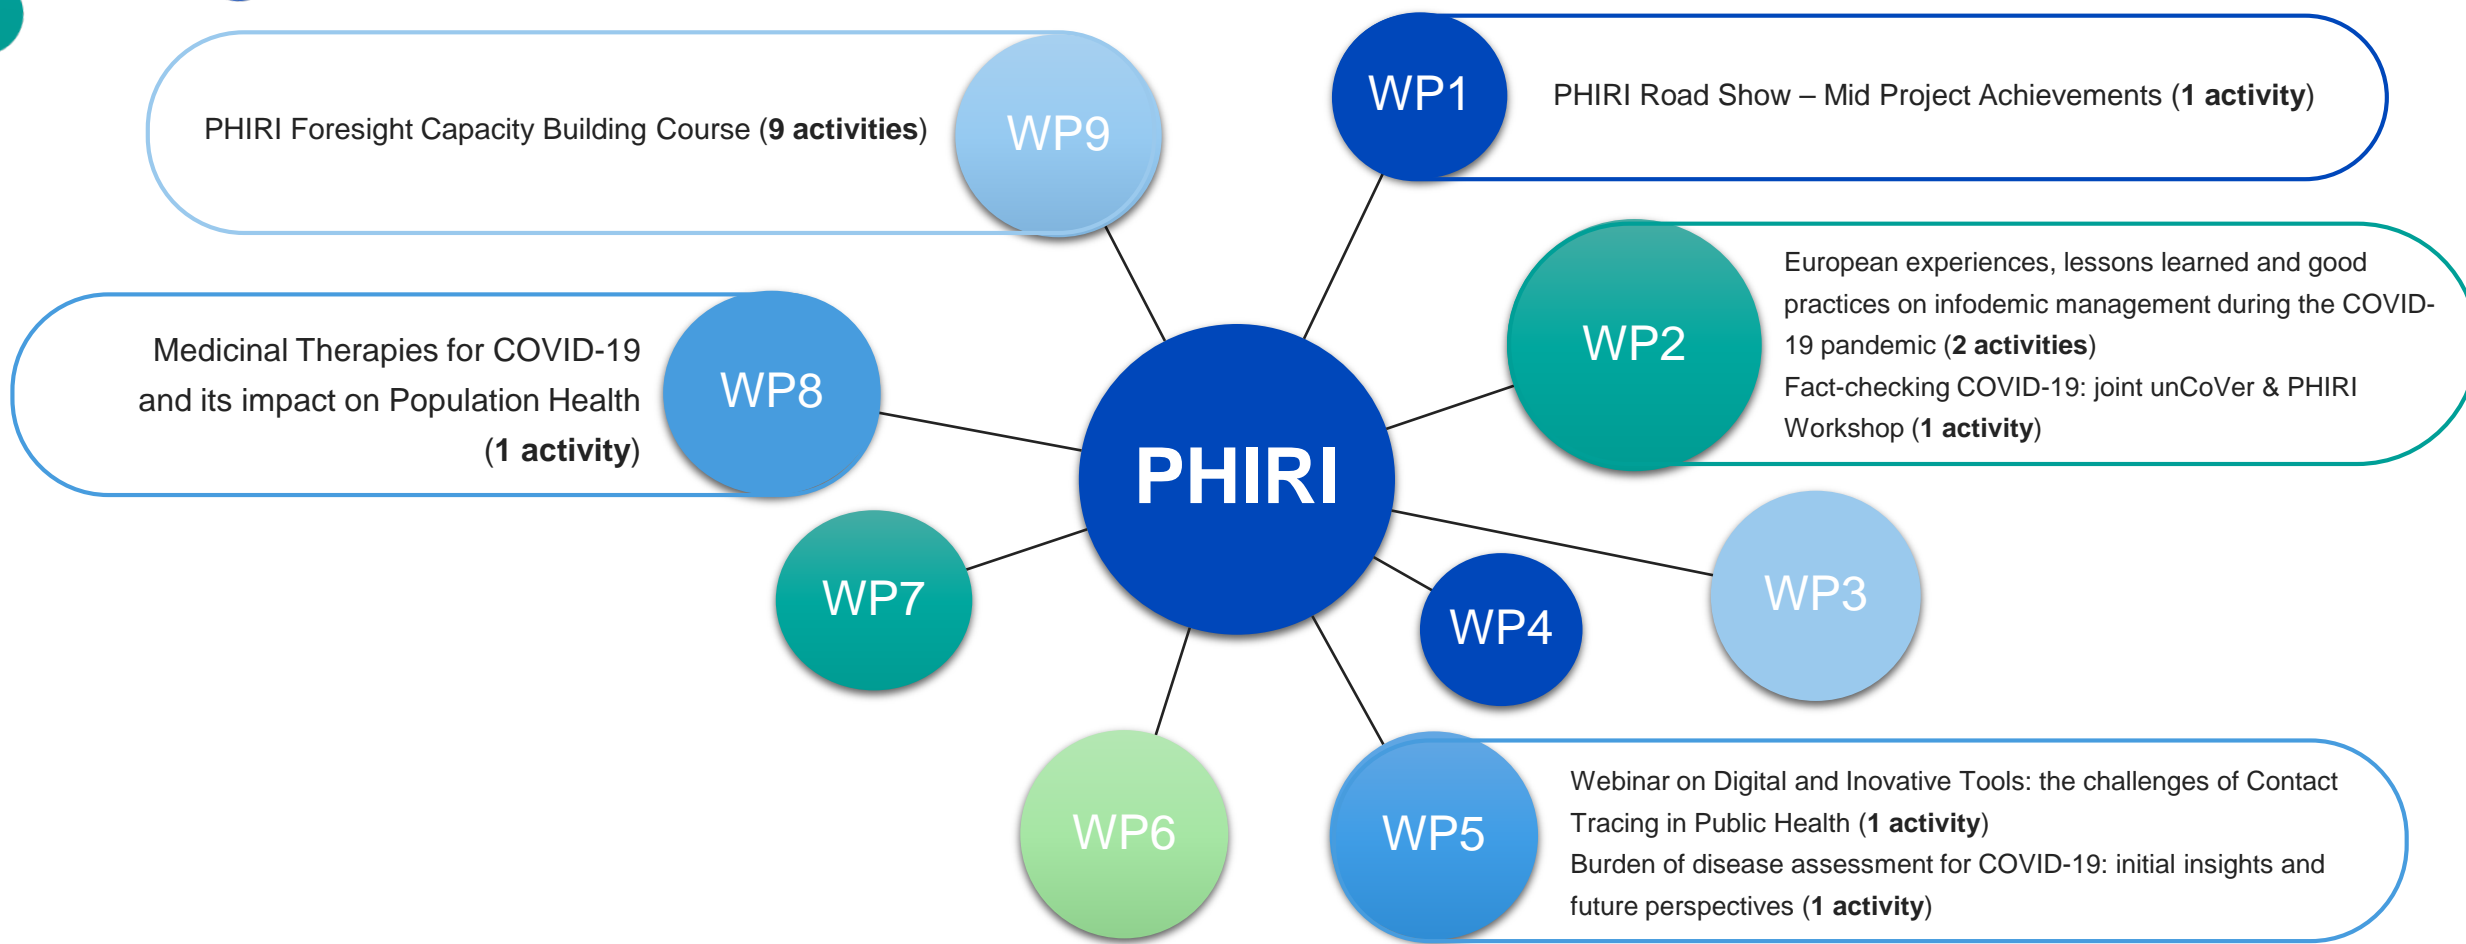

Activity Title	Short Activity Title	Activity Acronym	Activity description	Topic
Free Text	Free Text	Free Text	Free Text	Predefined list/Md5n terms
Management of IT travelers at points of entry in the context of COVID-19 outbreak	Not provided	Not provided	The current outbreak of novel coronavirus (COVID-19) disease has spread across borders through travelers, conveniences, which has prompted demands for the detection and management of suspected cases at points of entry (POE), including ports, airports and ground crossings, on board crossings. At the end of the course, participants should be able to outline the core capacities and put in place mechanisms that facilitate the management of IT travelers suspected to have COVID-19 at points of entry and on conveniences of all types.	Geographic Monitoring
Introduction to COVID-19: Methods for detection, prevention, response and control	Not provided	Not provided	This course provides a general introduction to emerging respiratory viruses, including novel coronaviruses. By the end of this course, you should be able to describe the nature of emerging respiratory viruses, how to detect and assess an outbreak, strategies for preventing and controlling outbreaks due to novel respiratory viruses, and what strategies should be used to communicate risk and engage communities to detect, prevent and respond to the emergence of a novel respiratory virus.	Epidemiologic Monitoring
Introduction to Go Data – Field data collection, chains of transmission and contact follow-up	Not provided	Not provided	Go Data is a field data collection platform focusing on case data (including lab, hospitalization and other variables through case investigation form) and contact data (including contact follow-up). This briefing package provides an orientation to the purpose, benefits and utilization of Go Data, consisting of 7 modules with a narrated walkthrough of the key features of the Go Data web-based platform and mobile application.	Contact Tracing
Operational Planning Guidelines and COVID-19 Platform to support country preparedness and response	Not provided	Not provided	This 3-module learning package introduces the context for the need for a coordinated global response plan to the COVID-19 outbreak. It provides the required guidance to implement the Operational Planning Guidelines to Support Country Preparedness and Response.	Epidemiologic Monitoring
COVID-19 infodemic management: risk communication and community engagement challenges	Not provided	Not provided	This course will focus on how countries, communities and individuals are managing public health and social measures by maintaining what's working while addressing challenges that still lie ahead for 2021. As countries exit (PHI) in and out of restrictions, the COVID-19 pandemic is having significant impacts on people's everyday lives.	Infodemic
Management and Facilitation of a Country COVID-19 Intra-Action Review (AIR)	Not provided	Not provided	This course provides a general introduction to the management and the facilitation of an AIR during the ongoing COVID-19 pandemic through presentations, quizzes and an assessment at the end of the course to test the knowledge acquired.	Pandemic Response
COVID-19 and work: Staying healthy and safe at work during the COVID-19 pandemic	Not provided	Not provided	This course is intended to guide workers and their representatives, business leaders, managers, as well as occupational health and safety professionals in protecting their workplace during the COVID-19 pandemic.	Primary Prevention
Guidance on mask use in the context of COVID-19	Not provided	Not provided	This training is based on scientific evidence and WHO guidance relevant to the use of masks for reducing the spread of SARS-CoV-2 in different settings. This course targets decision-makers, IPC professionals, healthcare workers, and the general public.	Universal Precautions
Orientation to national deployment and vaccination planning for COVID-19 vaccines	Not provided	Not provided	This course is intended to support national and sub-national focal points in preparing for COVID-19 vaccination. It provides an overview of key aspects of the guidance on developing a national deployment and vaccination plan for COVID-19 vaccines and highlights available and upcoming resources for COVID-19 vaccine introduction.	Immunization
COVID-19 vaccination training for health workers	Not provided	Not provided	This course provides general information on COVID-19 and specific information on storage, handling and administration of the vaccine, recording and monitoring including for adverse events following immunization (AEFI), and communication (acceptance and demand) through a series of short video lectures and quizzes to test your knowledge.	Immunization
COVID-19 Exercise Programme - Drills for Vaccine Deployment	Not provided	Not provided	This programme has been developed as a set of four drills that can be undertaken to test and practice key elements of your COVID-19 vaccine deployment programme using real resources and staff.	Immunization
Supply chain and communication strategies - COVID-19 Vaccine Tabletop exercise	Not provided	Not provided	A COVID-19 vaccine tabletop exercise that aims to assist countries to plan, develop and update their national deployment and vaccination plan (NDVP) for the equitable timely access to COVID-19 vaccines specifically addressing logistical supply chain & communication strategies.	Health Communication
Regulatory and Safety Issues - COVID-19 Vaccine Tabletop exercise	Not provided	Not provided	A COVID-19 vaccine tabletop exercise that aims to assist countries to plan, develop and update their national deployment and vaccination plan (NDVP) for the equitable timely access to COVID-19 vaccines specifically addressing regulatory and safety issues.	Data Security
COVID-19 - Public Health and Social Measures (PHSM) Tabletop exercise	Not provided	Not provided	A Public Health and Social Measures (PHSM) tabletop exercise to conceptualize and manage ongoing (local) COVID-19 outbreaks in the country, while minimizing social and economic disruption through effective public health and social measures.	Universal Precautions
Urban COVID-19 Tabletop exercise	Not provided	Not provided	An Urban COVID-19 tabletop exercise to discuss critical issues in urban environments as the pandemic develops into an established infectious disease that may have periods of increased spread and number of persons affected.	Universal Precautions
Point of Entry (POE) Tabletop exercise	Not provided	Not provided	A Point of Entry (POE) tabletop exercise to examine and strengthen countries' existing plans, procedures and capabilities for managing COVID-19 cases in international travel including in aviation and ground crossings.	Geographic Monitoring
Health facility & Infection Prevention and Control Tabletop exercise	Not provided	Not provided	A Health facility & IPC tabletop exercise that aims to examine the implementation of IPC strategies required to prevent or limit transmission of COVID-19 in health care facilities.	Primary Prevention
