

WORK PACKAGE 3: STAKEHOLDER INVOLVEMENT

PHIRI, the Population Health Information Research Infrastructure, reckons that exchanging expertise, methods, and tools and identify synergies with other organizations, projects and initiatives working in the same field is essential to **build on what exists, learn from each other and avoid duplication**. In order to **interact** with the **diverse players** in the health data field, PHIRI has organized and will organize several meetings to **target the various needs of stakeholders**:

Inclusive Stakeholder meetings

The inclusive stakeholder meetings **present PHIRI's activities** that are relevant for researchers, research networks, and research infrastructures across Europe; **hosts pitches and facilitates dialogues** between from stakeholders and who are working in similar fields to **identify synergies** and areas of collaboration; and **connects European researchers and projects leaders** with relevant PHIRI partners and vice versa. Read more [here](#).

Rapid Exchange Forum – Special Editions

The Rapid Exchange Forum – Special Editions aim to shed some light on the **international activities and expert groups** that are already in place or that have been set up during the pandemic to **exchange information** on measures related to COVID-19 and that require **rapid action**. Read more [here](#).

Targeted Work Package (WP) Stakeholder meetings

The targeted WP stakeholder meetings aim to discuss the **obstacles** and possible **solutions** related to specific tasks or WPs within the project. This type of meeting is **smaller** compared to the inclusive stakeholder meeting as it wants to ensure the possibility to have **fruitful discussions** in smaller groups among the participants.

PREPARE cluster

The European Commission has recently funded many projects to work on different aspects of crisis management, many with a focus on managing pandemics. PHIRI, together with twelve other EU-funded H2020 projects, have united to form the **PREparedness and resPonse for emergency situAtions in euRopE** (PREPARE) cluster. Together these projects explore synergies, research opportunities and deliver joint activities to **maximise impact**. Read more [here](#).

PHIRI 1 Year Anniversary

During its anniversary, PHIRI showcased key outcomes of the project and put these outputs into perspective in order to fuel and promote an active discussion around three main themes that are at the core of PHIRI:

- **Crisis preparedness & rapid policy and research response**
- **Research questions on the impact of COVID-19 on population health and future scenarios**
- **A common vision on the future of facilitating the secondary use of health.**

ABOUT PHIRI:

The **PHIRI project** implements a Population Health Information Research Infrastructure, facilitating open, interconnected and data-oriented population health research across Europe. It aims to improve collaboration and exchange of good practices between European countries regarding **collection, evaluation, accessibility and reuse of health data**, and to promote **sharing of expertise**. In addition, it strives to provide better integration and

strengthening of research networks and population health data sources in Europe, through metadata catalogues and trainings.
